Dr. Pratt and Dr. Powell will discuss the history of the development of physical activity recommendations and policy in public health, how physical activity became an integral part of chronic disease prevention and health promotion, and what still needs to be done both in the U.S. and globally to drive population level changes in the prevalence of physical activity.

Kenneth E. Powell, MD, MPH, is a public health and epidemiologic consultant. He was an epidemiologist with the Centers for Disease Control and Prevention for 25 years and with the Georgia Department of Human Resources for nearly 8 years.

Michael Pratt, MD, MPH is a professor in the Department of Global Health at Emory and the Senior Advisor for Global Health in the National Center for Chronic Disease Prevention and Health Promotion at the CDC.

**EPAWG Fall Meeting** (immediately following talk)
2:30 PM - 3:30 PM
CNR 2001
This meeting will focus on updates since our launch last semester, highlight themes in our newsletter and include an open forum for discussions on physical activity related work including grants, collaboration and research opportunities.

**The Emory Physical Activity Working Group (EPAWG)**
Open to members of the Emory Community (Woodruff, Global Health Institute, ACTSI, Medicine, Nursing, law/ health policy) that have an interest in Physical activity research, measurement, evaluation and policy for both US and global audiences.
