Environmental exposures in early life: Influences on obesity and diabetes risk throughout the life course

Anne Starling, PhD
Postdoctoral Fellow
Department of Epidemiology
Colorado School of Public Health

Anne Starling is a Postdoctoral Fellow in the Department of Epidemiology at the Colorado School of Public Health. Her current research, located within the Lifecourse Epidemiology of Adiposity and Diabetes (LEAD) Center at the University of Colorado, examines environmental influences during pregnancy and the early-life origins of chronic disease. Dr. Starling completed her PhD at the University of North Carolina at Chapel Hill, with a focus on reproductive and environmental epidemiology. Prior to her doctoral work, she studied evolutionary biology and behavioral endocrinology and received a master’s degree from the University of Cambridge and a B.S. from Duke University.
